

Surfshark

Some examples of my current work at Surfshark.

Surfshark Antivirus

Me and my colleagues were working on Surfshark Antivirus project. I was working mainly on Windows OS app. The main goal was not only to create a perfect user flow from installing the app to scanning process, but also to have a really eye catching user interface.

Widgets

We created some widgets for iOS and Android platforms. Widgets have 3 different sizes - small, medium and large. Also, appearance of widgets depends on system appearance.
