

OmNiam

Mobile App

OnNiam - clear solution to find, try and share recipes in a couple of taps.

1. About

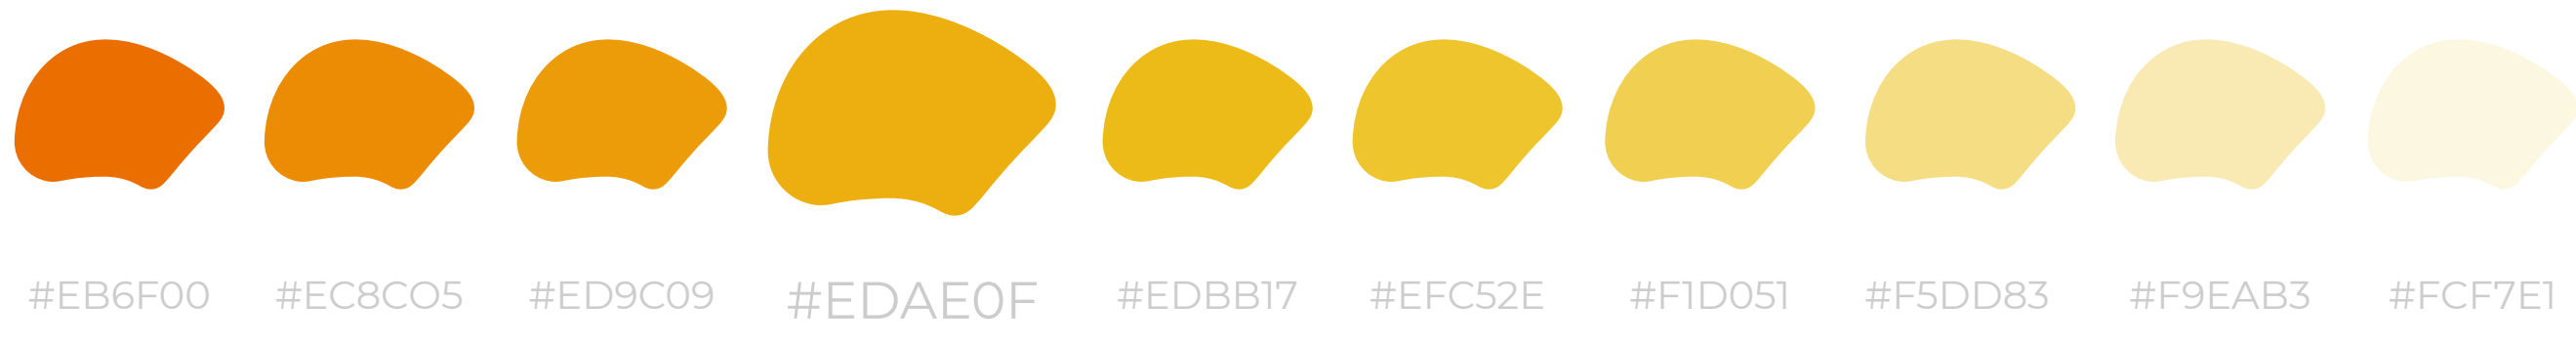

The main goal was to design a clean looking mobile application, using Material UI specifications.

In this app You can explore and share your favourite recipes.

2. Colours

The inspiration of colour palette was from an egg yolk - which is one of the most common ingredients in cooking.

Primary

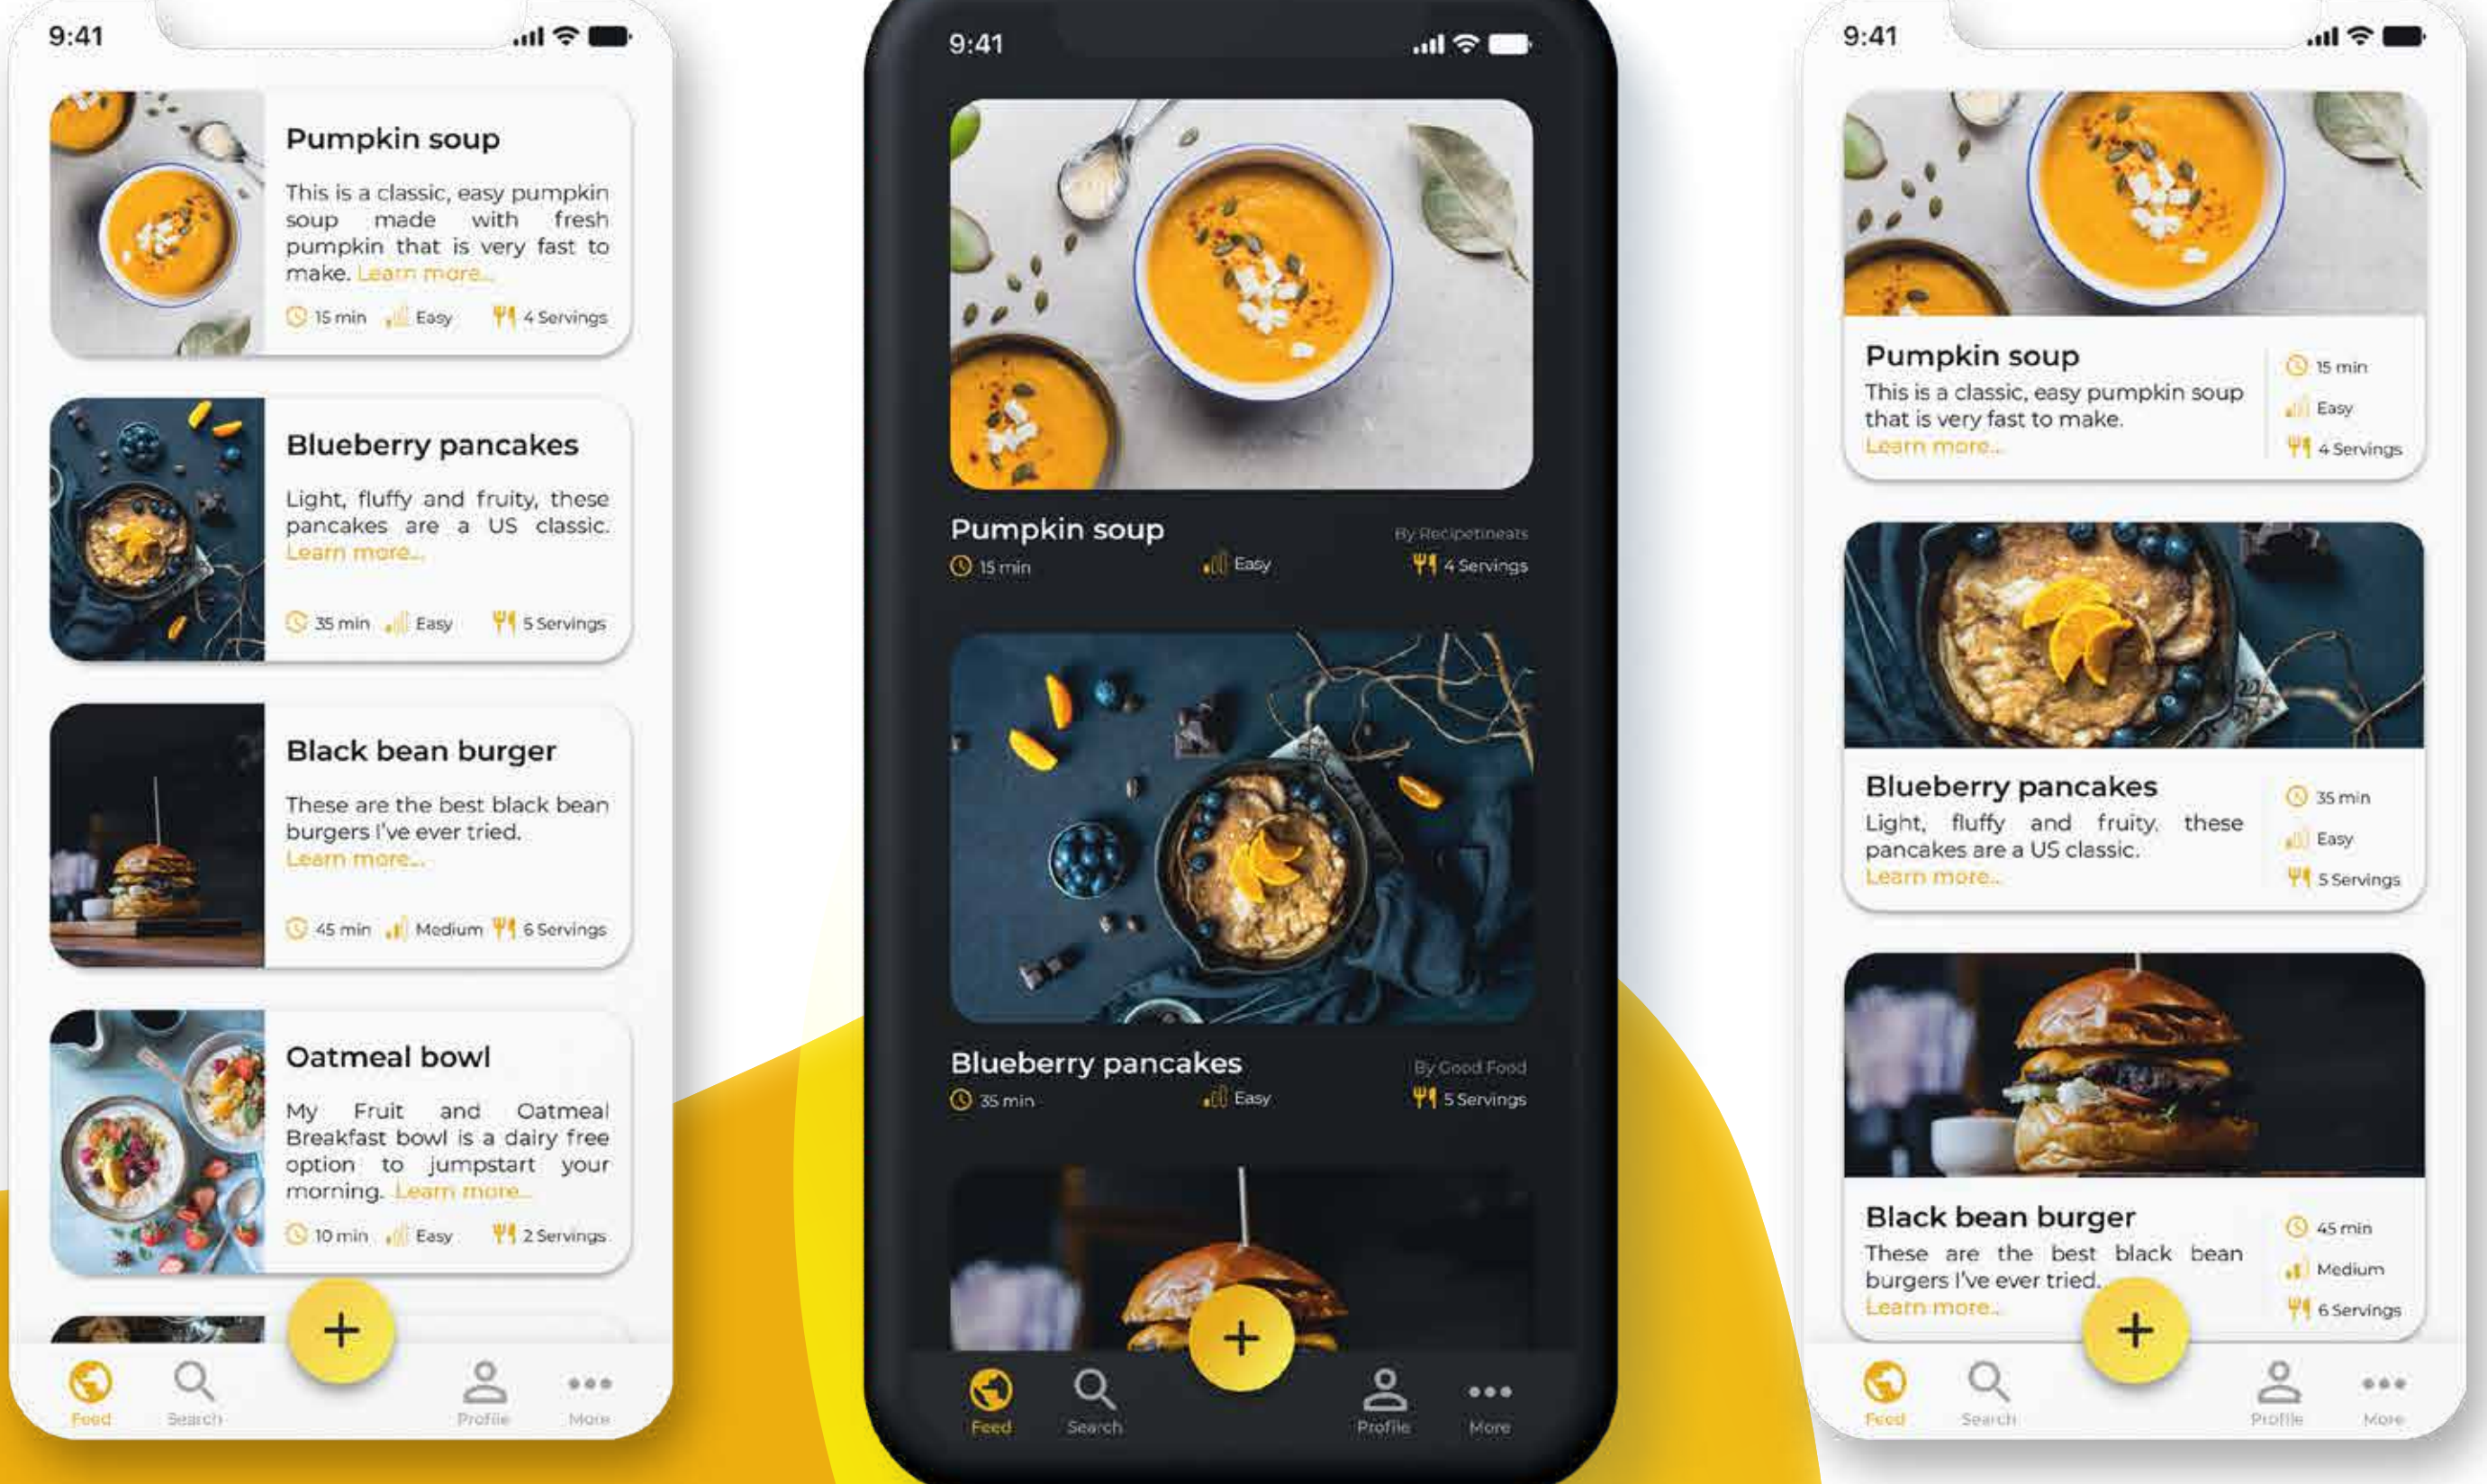

3. Dark and Light modes

Dark or Light mode is set automatically based on system settings.

4. Feed

You can choose between three different card styles of the recipe feed. All card styles are based on Material UI specifications.

5. Timer

To make app more user friendly, you can set a timer in the app.

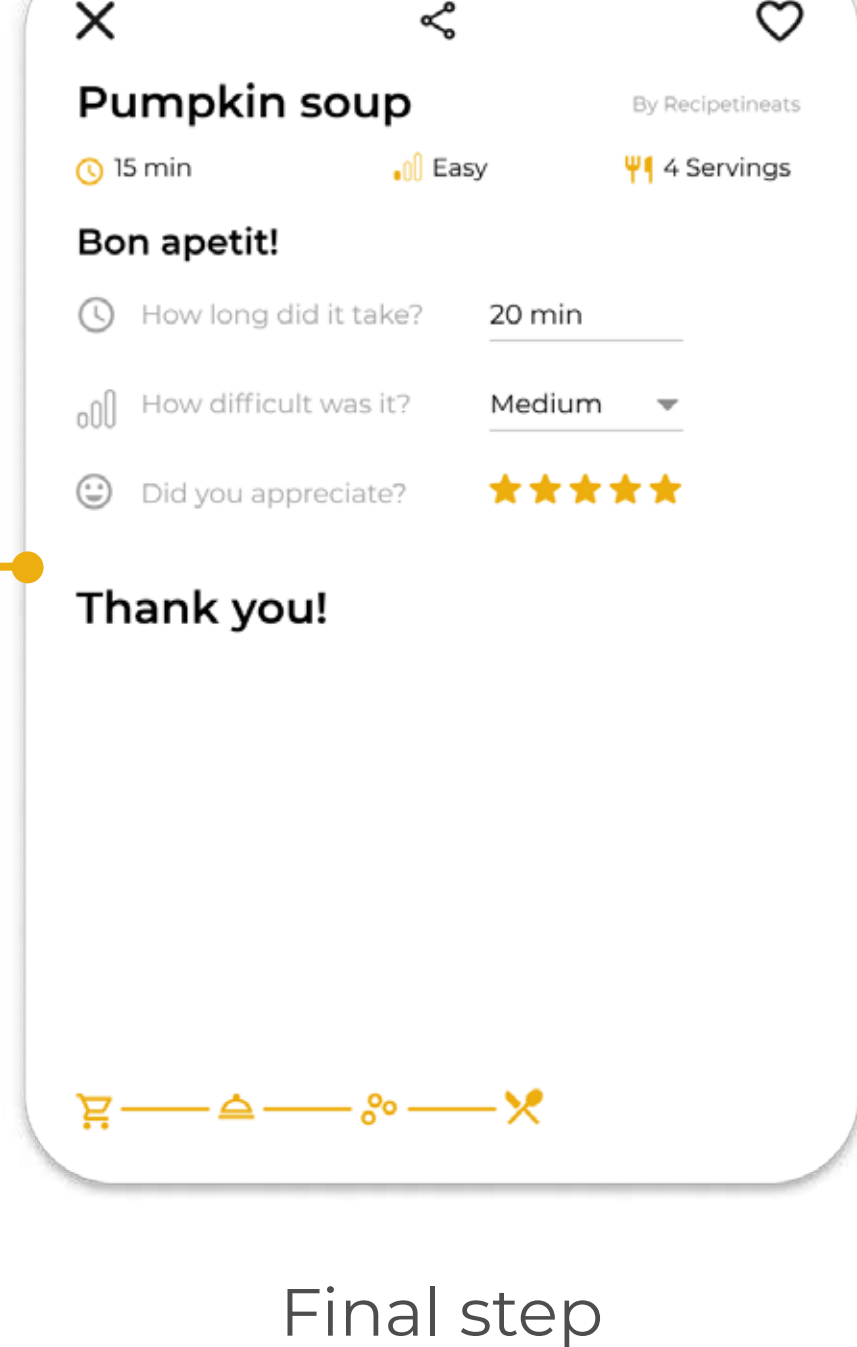

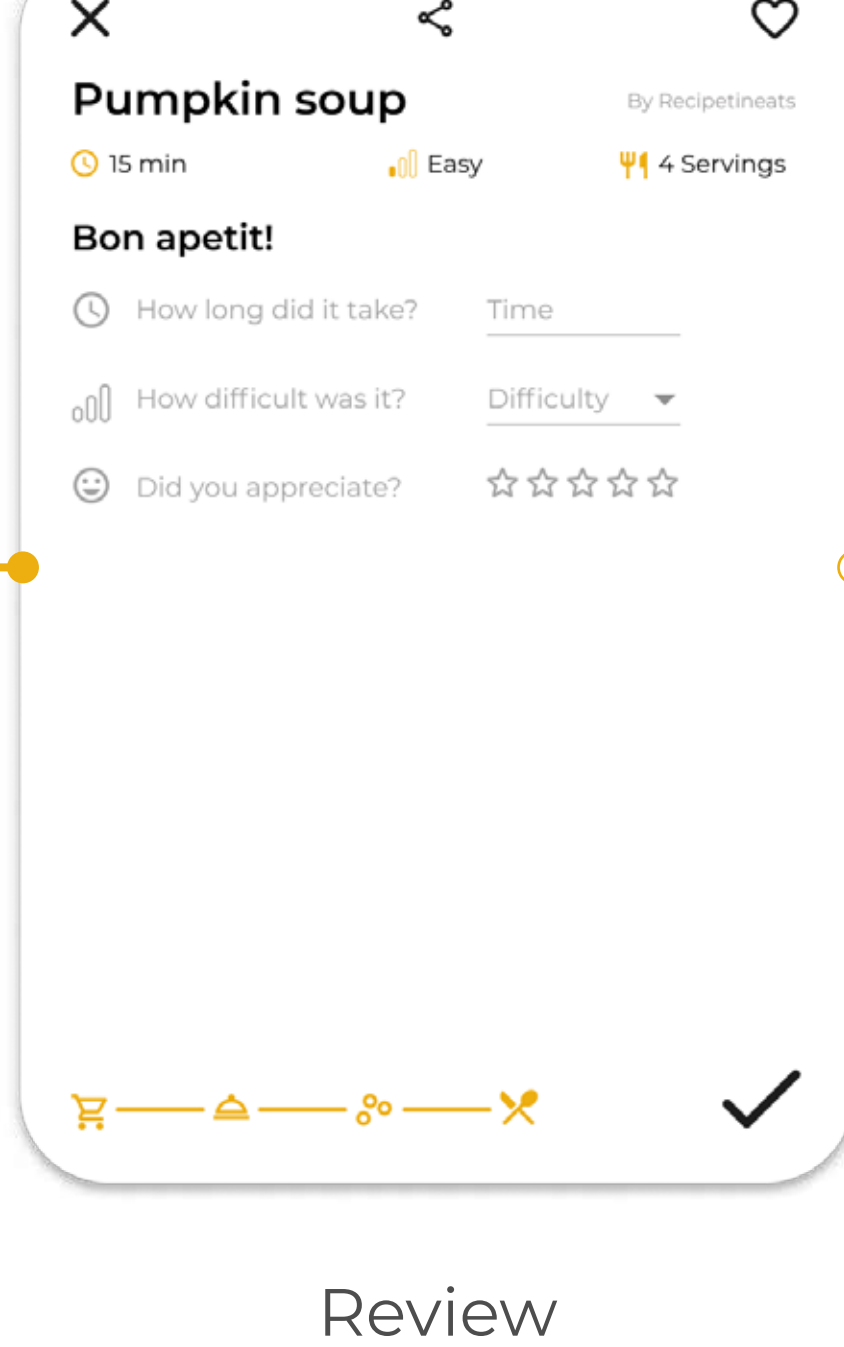

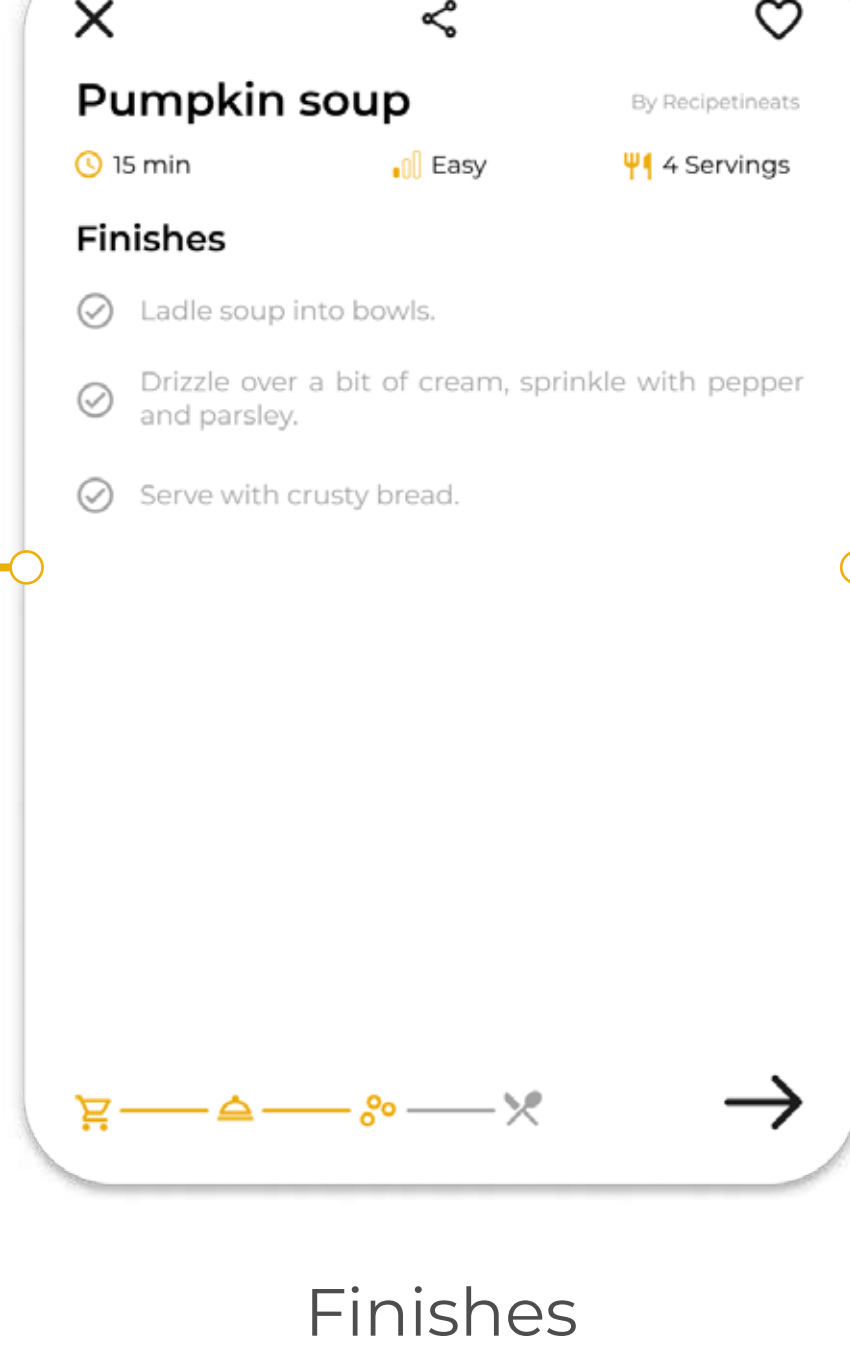

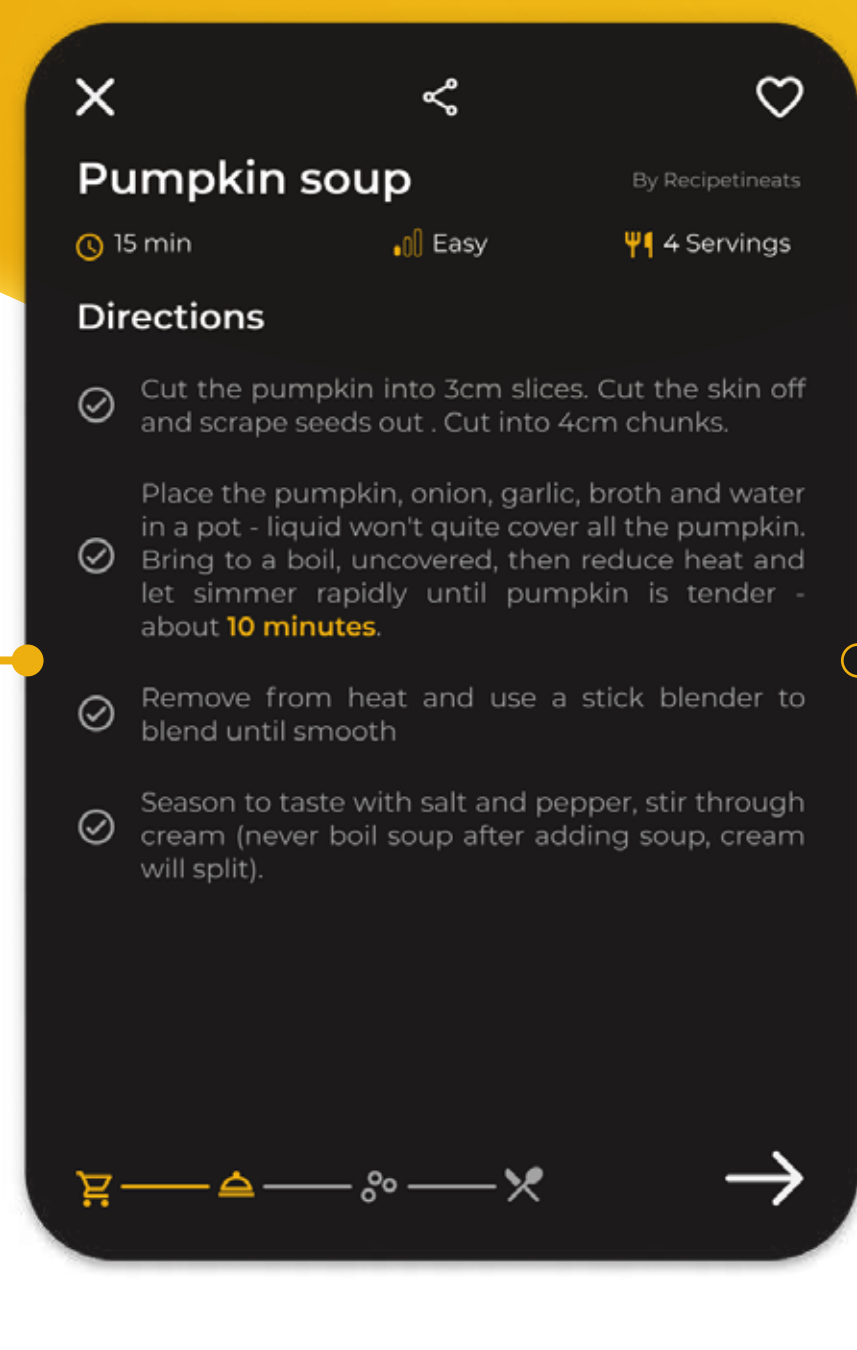

6. Cards of instructions
