

# OmNiam

## Admin panel

OnNiam - clear solution to find, try and share recipes in a couple of taps.

## 1. About

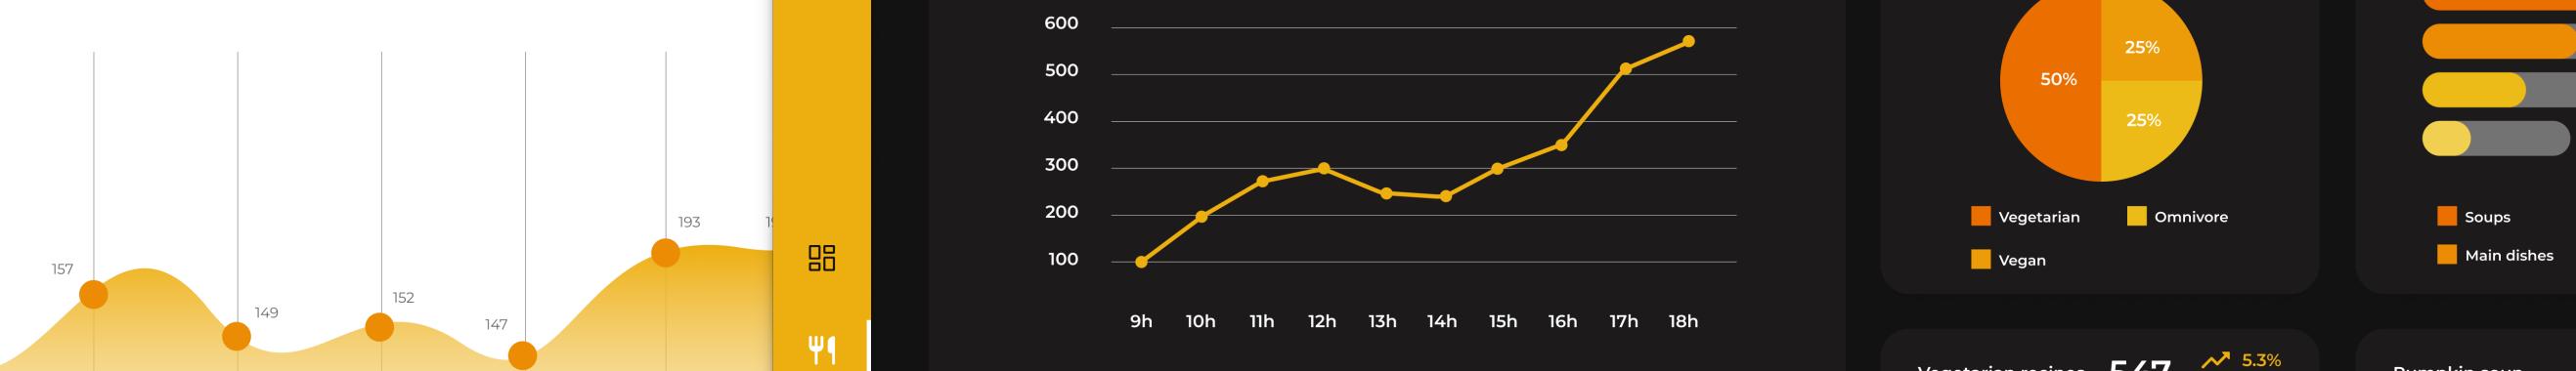

The main goal of this project was to create user friendly and good looking admin panel of OmNiam mobile app.

This admin panel was created using specifications of Material UI.

## 2. Colours

The colour palette which I used, is the same as palette of OmNiam mobile application. So, the inspiration of colour palette was from an egg yolk - which is one of the most common ingredients in cooking.

Primary

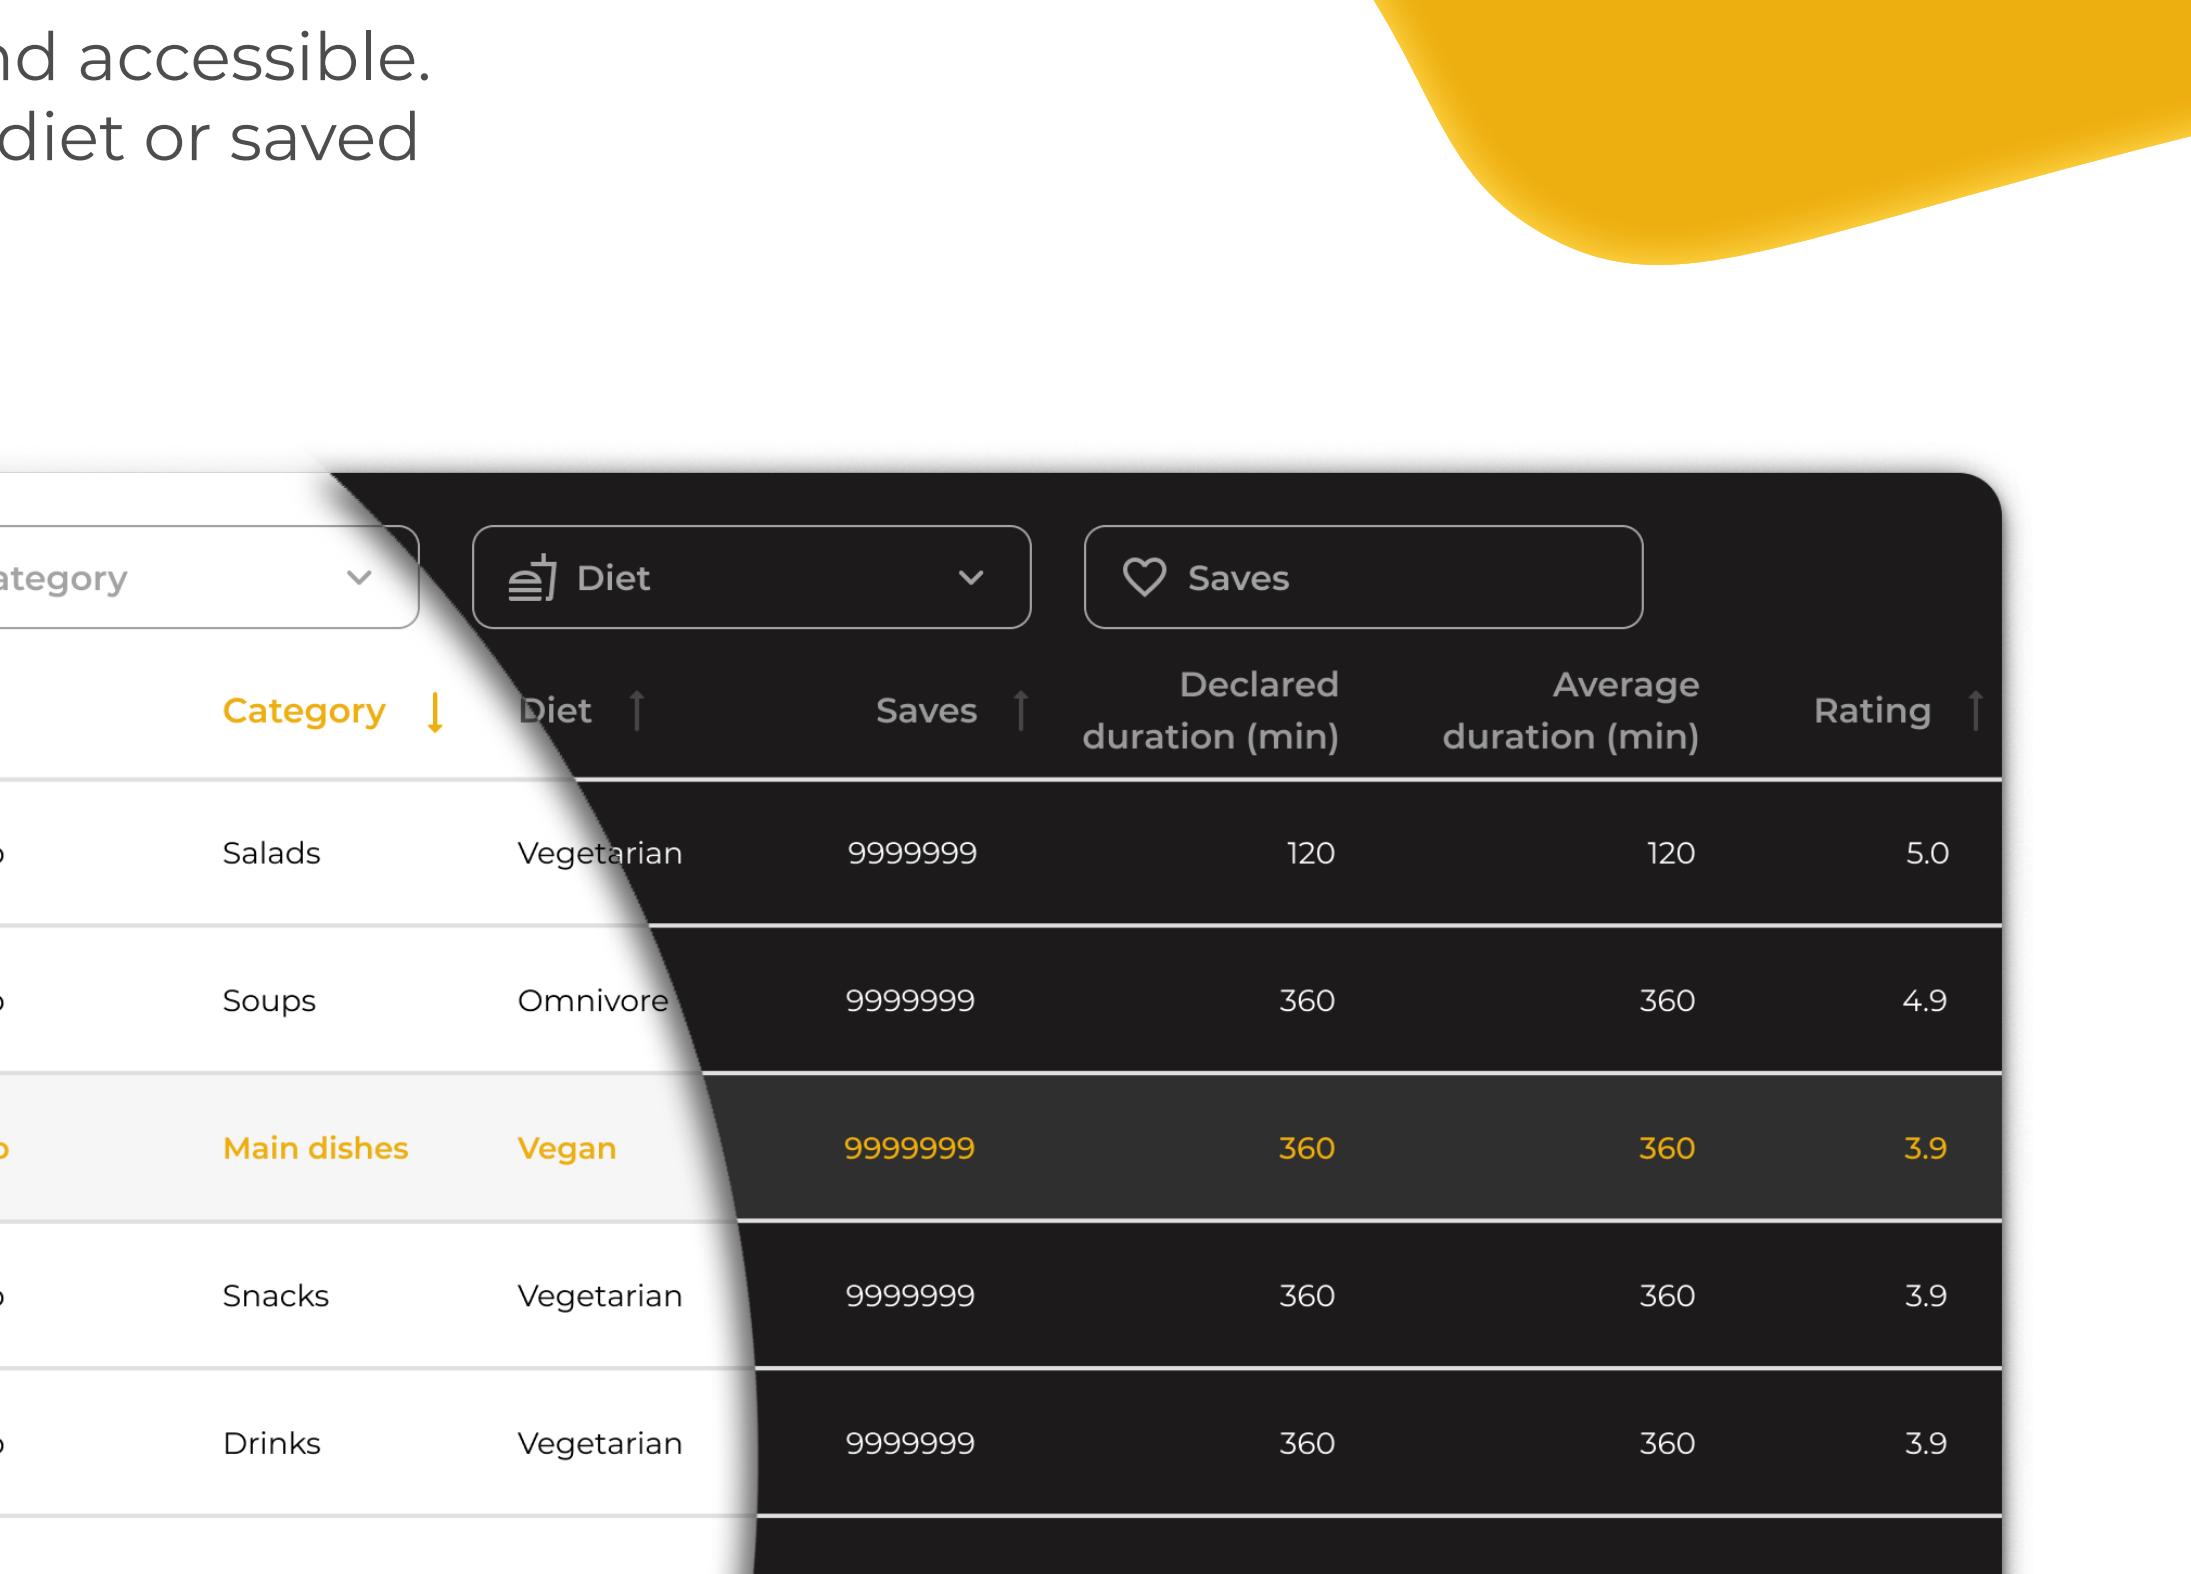

## 3. Dark and Light modes

This admin panel has two colour modes - dark and light. The mode depends on OS colour mode which user is using. Also, user can change mode manually.

## 4. Sidebar

The admin panel has left navigation menu - sidebar. Users can decide which sidebar design is better for them- expanded or minimized.

## 5. Tables

The admin panel has intuitive and accessible. User can filter data by category, diet or saved recipes.

Rows per page: 10 1-10 of 10 | < > >>

Search	Category	Diet	Saves	Declared duration (min)	Average duration (min)	Rating
